DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 14-20, 27, drawn to a method for authenticating a user, classified in class 713, subclass 202.
 - II. Claims 8-13, 21-26, 28, drawn to a method of managing authentication information including presenting a list of account, classified in class 705, subclass 65.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as presenting a list of accounts, wherein each account is associated with a resource to be accessed using a terminal.

See MPEP § 806.05(d).

3.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5.

Art Unit: 3621

6. A telephone call was made to Marilyn Dawkins (Reg. No. 31140) on January 24, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made (i.e. *a voice message was left for Dawkins*).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
